

Job-Card Lifecycle & Notification Flow

Pulse VAS · SetuPPF Portal — the end-to-end job-card lifecycle: every status, its trigger, and exactly who is notified on which channel. Stages are marked **New** or **Changed** versus what is currently built; unmarked = already built.

Source: Timeline → Flow blueprint (Notification tab). Generated 2026-08-10.

Sides: ● Supply (partner / installer) ● Demand (showroom / sales / customer) **Channels:** WhatsApp · Email · In-app (Push) · SMS

vs. current build: ✦ **NEW** ✦ **CHANGED** (unmarked = already built)

↗ Escalation up a chain resolves to Partner Admin, or Super Admin if the team has no partner admin.

● Core rules

- 1

One primary job card, cradle to grave
A single job card lives from creation until CLOSED. Every reschedule (including a team change) and the warranty all stay ON this same card, recorded as trail entries in its timeline.
- 2

Acknowledge = assign the team
A job card cannot be acknowledged without also assigning the team member who will do the work.
- 3

Reschedule never spawns a card
Reschedule updates the time (and optionally the team) on the SAME card and logs a trail entry. Before Start: partner + Super Admin (3× cap, SA unlimited). After Start: Super Admin only (may reassign a new team; card keeps its Start button).
- 4

Pre-installation is a pass/fail gate
After Reached, the pre-install check has an explicit outcome: FAIL → back to Reschedule; PASS → Start becomes available.
- 5

Rework is the only thing that can branch
Rework with a NEW team → a new linked card (trail in the primary).
Rework with the SAME team → stays on the primary card. Photos are attached per affected part, each with FOC or an editable cost.
- 6

Billing follows the work (post-approval)
After approval a 3-party trail is recorded — detailer/staff → company/Partner Admin → showroom. If the Partner Admin IS the company, it invoices the showroom directly. If our detailer worked under a DIFFERENT Partner Admin, we bill that Partner Admin (who bills the showroom).

→ Lifecycle flow — every status, trigger & who is notified

- 1

Work Order created **DRAFT**
Salesperson / Showroom / Partner Admin / Super Admin creates the work order.

○ No notification
- 2

Submitted → Assigned to partner **ASSIGNED**
On submit the WO is assigned to a partner; the (single, primary) job card is created here.

● Partner Admin Email
- 3

Job Card created **AWAITING ACK**
The primary job card is auto-created the moment the WO is assigned.

● Partner Admin Email · WhatsApp

This one job card lives all the way to CLOSED — reschedules & warranty all stay on it.

4

Acknowledged — team assignment REQUIRED **ACKNOWLEDGED**

✦ CHANGED

Partner Admin acknowledges AND must pick the team member (installer/detailer) at the same time — acknowledge cannot happen without assigning a team.

● **Assigned team member** WhatsApp · Email

#1 (new) — assigning the team is now mandatory to acknowledge.

5

Scheduled **SCHEDULED**

A date & time is set for the job.

● **Showroom / Salesperson** Email · WhatsApp

● **Partner Admin** Email · WhatsApp

● **Assigned team** WhatsApp

6

Reschedule — SAME job card, timeline trail **RESCHEDULED**

✦ CHANGED

Reschedule → new time + reason (+ optionally a different team member). 3× max for partner level; Super Admin unlimited.

● **Partner Admin / Staff** WhatsApp · Email

● **Showroom / Salesperson** WhatsApp · Email

#2 (corrected) — changing the team here does NOT create a new job card. It stays the same card; the change is recorded as a trail entry in this card's timeline. Reschedule is available at Scheduled, Reached, and even after a failed pre-install check.

7

Reminder — 3 hours before

3 hours before the scheduled time, an automatic check-in fires.

● **Team + Partner/Super Admin** WhatsApp

● **Showroom / Salesperson** WhatsApp

"Are you going to site?" to supply, "Is the car ready to dispatch?" to demand. Replies show under the eye button. A reschedule at this moment supersedes.

8

Reminder — at scheduled time

At the scheduled time, a confirm-arrival prompt fires; 60-minute wait, then the authority sets Reached.

● **Team + Showroom** WhatsApp

● **Partner Admin / Super Admin** WhatsApp

9

Reached **REACHED**

Team on site → "Reached" pressed. Partner level can only do this within 4h of the scheduled time; Super Admin any time. Reschedule is still possible here.

○ No notification

10

Pre-installation CHECK — Pass / Fail

✦ CHANGED

After Reached, the pre-installation check is done with an explicit outcome.

○ No notification

#3 (new) — FAIL → job goes back to Reschedule. PASS → the Start button appears. Rescheduling is still allowed up until Start.

11

Start work → In Progress **IN PROGRESS**

✦ CHANGED

"Start Work" appears once pre-install passes.

○ No notification

#3 (new) — AFTER start, only Super Admin may reschedule + reassign a new team; that keeps the same card and the card simply shows the Start button directly again. Partner level can no longer reschedule once started.

12

Completed — notify EVERYONE incl. customer **COMPLETED**

✦ CHANGED

Team marks the job complete.

● Customer

Email · WhatsApp

● Showroom / Salesperson

Email · WhatsApp

● Team + Partner Admin

Email · WhatsApp

#4 (changed) — message to all (mail + WhatsApp): “the job is completed; for any rework a 15-day buffer applies during which the rework is reviewed and a team assigned; after 15 days a car checkup is scheduled and its availability is informed accordingly.” Once Completed, “Apply for e-Warranty” is also available (both brands — the invoice is no longer required).

13

Pending approval **PENDING APPROVAL**

Awaiting showroom / admin approval.

○ No notification

14

Rework **REWORK**

✦ CHANGED

Rework requested from the job card.

● Team + Partner Admin

Email · WhatsApp

#5 (changed) — NEW team → a new linked rework card is created, with a trail entry in the primary card. SAME team → no new card. Photos are mapped & attached PER affected part (not one shared bundle). Each part has FOC (free of cost) or a cost, and the cost stays EDITABLE even after submit.

15

Approved **APPROVED**

Job approved by showroom / admin.

● Team + Partner/Super Admin

Email

● Showroom / Salesperson

Email

“Apply for e-Warranty” is available from the Completed stage onward (both brands) — it is no longer gated on the invoice, and the claim is registered against this same primary card.

16

Invoice → Closed **INVOICE RAISED**

✦ CHANGED

Sales invoice entered; card moves toward Closed.

○ No notification

#2/#4 (corrected) — e-Warranty may already have been issued from Completed onward; either way it is registered against the SAME primary job card (never a spawned one). The card stays open through Payment and finally CLOSED.

→ Worked example — one job through every case

WHEN	RECORD	EVENT
Day 1 · 10:00	WO-1234	Work order created Salesperson books PPF Full Body — Hyundai Creta. DRAFT
Day 1 · 10:05	JC-0001	Assigned → primary card Assigned to partner GlossPro; JC-0001 created. 🔔 Partner Admin (email + WA) AWAITING ACK
Day 1 · 10:30	JC-0001	Acknowledged + team assigned Installer Ravi assigned (required to acknowledge). 🔔 Ravi (WA + email) ACKNOWLEDGED

WHEN	RECORD	EVENT
Day 1 · 11:00	JC-0001	Scheduled — Day 2, 3:00 PM 🚩 Showroom/sales 🚩 Partner Admin 🚩 Ravi SCHEDULED
Day 2 · 12:00	JC-0001	Reminder — 3h before 🚩 Ravi/partner: "going to site?" 🚩 Showroom: "car ready?"
Day 2 · 15:00	JC-0001	Reminder — at time 60-min wait, no confirmation. ↗ Escalated to Partner Admin (→ Super Admin if none)
Day 2 · 15:10	JC-0001	Reached Partner Admin marks on-site (within 4h window). REACHED
Day 2 · 15:20	JC-0001	Pre-install FAIL → Reschedule Car not ready → new time Day 3, 11:00 AM + reason. 🚩 Both parties (WA + email) FAIL SAME CARD TRAIL ENTRY
Day 3 · 11:05	JC-0001	Reached → Pre-install PASS Start button now appears. PASS
Day 3 · 11:30	JC-0001	Start → In Progress IN PROGRESS
Day 3 · 13:00	JC-0001	Mid-job reassign (Super Admin) Ravi ill → reassigned to Sonu. Same card, keeps Start. 🚩 Both parties SUPER ADMIN ONLY SAME CARD TRAIL ENTRY
Day 3 · 16:00	JC-0001	Completed e-Warranty can be applied from here (both brands — no invoice required). 🚩 Everyone incl. customer (mail + WA): 15-day buffer + checkup COMPLETED
Day 4 · 10:00	JC-0001	Approved 🚩 Team + Partner Admin + showroom (email) APPROVED
Day 4 · 10:05	BILLING	Billing trail recorded Detailer = ours, Partner Admin = GlossPro (≠ company) ⇒ we bill GlossPro; GlossPro bills showroom. VARIABLE PRICING
Day 6 · 09:30	JC-0002	Rework — NEW team (Amit) Edge-lifting. New linked card JC-0002; per-part photos — bumper ×2 (FOC), left door ×1 (₹800, editable). 🚩 Team + Partner Admin (mail + WA) NEW LINKED CARD TRAIL ENTRY VARIABLE PRICING
Day 20	JC-0001	Invoice → Closed e-Warranty already issued at completion on JC-0001; invoice → payment → CLOSED. SAME CARD

Branch not shown: had the rework gone to the **same** team (Sonu), no new card would be created — it would be handled on JC-0001 directly.

☰ Post-approval billing trail

☐ If ② is the company

The Partner Admin IS us → the company invoices the showroom directly (① → ③).

🕒 If ① is ours under a different Partner Admin

Our detailer did the work but the Partner Admin is a separate company → we bill the Partner Admin, who bills the showroom.

🔪 Team changes (reschedule reassignment or rework to a new team) can change who performed the work, so the price is **variable and editable** per job / per rework part — including after the form is submitted.
